**SECTION C**  
**(COMPETENCY BASED QUESTIONS)**

**Answer any 5 questions out of the given 7 questions**

**(1 x 5 = 5 marks)**

"Students were playing on the playground because they wanted to do extra practice for inter-school competitions. One solar lamp was present on the playground, but it wasn't in working condition. As per the student's request, the principal called the electrician to repair a lamp. He followed safety norms while repairing the lamp, replacing the faulty neutral wire from the circuit. He suggested that the lamp pole must be repaired as it was rusted and cracked because the lamp is on an open field. He proposed to call the welder. From his suggestions, the teacher called the welder to repair the lamp pole. He started repairing it using a welding machine. But the spark of the welding process bothered his eyes. The welder's eyes became red and teary, but he kept doing the task and repaired the lamp pole on the ground."
