Why is aiming by far the most difficult operation in shooting? Explain the laws of aiming.

6

Ans.

Because as the eyes have certain limitation and there are influences

	<p>affecting on what it does. Nevertheless good shooting can be obtained with consistency of aim.</p> <p>Laws Of Aiming</p> <ol style="list-style-type: none"> 1. Focus the target so that a clear picture is formed on the retina of the eye and get the true center of the target and focus to the foresight. 2. Hold the rifle properly and keep it upright. 3. Close the left eye and focus the foresight. 4. See the foresight through the backside 'U'. The foresight should be seen right in the centre of the 'U'. The tip of the foresight should be aligned in the centre and in level with the shoulder of the 'U'. <p>Elevation is given to counter the force of gravity, while the bullet is in flight. The elevation depends on the range of the target.</p>	
17.	<p>Explain the three styles of communication? What does effective communication involves?</p>	6
Ans.	<p>There are three styles of communication as under:-</p> <p>(a) Aggressive. They believe that everyone should like them; I am never wrong I've got rights but you don't. They have a close mind and are poor listeners. They have difficulty in seeing the other person point of view, they interrupt and monopolize. They tend to dominate and put down others. They are bossy. While communicating they frown, stare, talk loudly or have a yelling tone of voice.</p> <p>(b) Passive. In such communication the persons do not express their true feelings; they do not disagree and think that others have more rights than they do. Their communication style is indirect, they always agree and do not speak out and are very hesitant. While communicating they often lack facial expression and stand with down cast eyes.</p> <p>(c) Assertive. In such communication the person believes those he/she as well as others are valuable. They know that if they have rights then others also have rights. They are active listeners and check on others feelings. They are action oriented, attentive, vocal, expressive, good listeners, aware, supportive, persuasive, fair, open and consistent in behavior. Their expectations are realistic. They have open and natural gestures. They maintain an eye contact while communicating.</p> <p>EFFECTIVE COMMUNICATION Effective Communicative involves:-</p> <p>(a) Verbal Communication. One person talks and others listens to be able to react. The conversation can be informative, in the form of questions, a negotiation, and statement or open ended questions, instruction, etc. And the situation can be formal or informal. In</p>	

relationships, communication is usually informal. A speaker, to clear up misunderstand of what is said may ask questions to gain information and may repeat in a different way (paraphrase). Speech problem, too long sentences, mumbling, speaking too softly, hearing problems, listeners interrupting the speaker, loud external noises, etc. all hamper proper communication.

(b) **Non-Verbal Communication.** Non verbal communication is that gives meaning to what is said and may communicate both appreciation and rejection. It includes such things as tone of voice, a nod of head, using silence, frowning, smiling, body posture, touch, shaking of the head to communicate approval or disapproval, lifting of the eyebrows to show surprise, distance between persons, playing with something in hand instead of focusing etc. The body language communicates a lot in the communication process. Body language can be easy to read, but at the same time easy to misinterpret. It is not only important to observe the non-verbal communication of others and understand how well they receive or reject the communication, but also use proper body language to communicate effectively. Ensure that you appreciate others through body language. React to what others say by nodding, smiling and generally showing you are listening.

(c) **Listening.** During communication, one person talks and another person listens. The listeners must give attention to all that is said, without interrupting the speaker and react later in a relevant manner. Many people may listen but know what the full message is. Some people react to only half is said. There are people who listen “selectively”, who miss much of the message and only focus on points relevant to him or her. Sometime we do not listen to our friends and other people; sometimes they do not listen to us. In either situation, there will be a problem in communication and understanding.
